

Request to Office of Public Works for pre-refurbishment/demolition asbestos survey

The Safety Health and Welfare at Work (Exposure to Asbestos) Regulations 2006 require pre-work surveys where the possibility of asbestos disturbance exists. If you are involved in the design of refurbishment works, demolition or mechanical/electrical upgrades then you should contact the Office of Public Works' Health and Safety Unit and request a pre-refurbishment/demolition asbestos survey as part of the design process.

In all circumstances, it is essential that architects, designers and/or project managers ensure that sufficient time is allowed for the completion of an intrusive asbestos survey and that this survey is requested and completed **prior to the tender stage** of the project.

Please provide information below and return to asbestos@opw.ie
