Physical disability

Such pupils have permanent or protracted disabilities arising from such conditions as congenital deformities, spina bifida, dyspraxia, muscular dystrophy, cerebral palsy, brittle bones, or severe accidental injury. Because of the impairment of their physical function they require special additional intervention and support if they are to have available to them a level and quality of education appropriate to their needs and abilities.

Many require the use of a wheelchair, mobility or seating aid, or other technological support.

They may suffer from a lack of muscular control and co-ordination and may have difficulties in communication, particularly in oral articulation, as for example severe dyspraxia.

Pupils with a physical disability who have learning difficulties arising from the disability **may** need resource teaching where there are consequent significant learning difficulties. Others may need assistive technology only.

Hearing impairment

Such pupils have a hearing disability that is so serious to impair significantly their capacity to hear and understand human speech, thus preventing them from participating fully in classroom interaction and from benefiting adequately from school instruction. The great majority of them have been prescribed hearing aids and are availing of the services of a Visiting Teacher. **(This category is not intended to include pupils with mild hearing loss.)**

Schools that have a pupil who has been assessed as having hearing impairment and no other assessed disability, may be allocated a maximum of 4 hours teaching support per week from a resource teacher, or from a visiting teacher and resource teacher combined.

Where a pupil with a hearing impairment also meets the criterion for another low-incidence disability category, provision is allocated as for multiple disabilities.

Visual impairment

Such pupils have a visual disability which is so serious as to impair significantly their capacity to see, thus interfering with their capacity to perceive visually presented materials, such as pictures, diagrams, and the written word. Some will have been diagnosed as suffering from such conditions, such as congenital blindness, cataracts, albinism and retinitis pigmentosa. Most require the use of low-vision aids and are availing of the services of a Visiting Teacher. **(This category is not intended to include those pupils whose visual difficulties are satisfactorily corrected by the wearing of spectacles and/or contact lenses.)**

Schools that have a pupil who has been assessed as having a visual impairment, and no other assessed disability, may be allocated a maximum of 3.5 hours teaching support per week from a resource teacher, or from a visiting teacher and resource teacher combined.

Where a pupil with a visual impairment also meets the criterion for another low-incidence disability category, provision is allocated as for multiple disabilities.

Emotional disturbance and/or behaviour problems

Such pupils **are** being treated by a psychiatrist or psychologist for such conditions as neurosis, childhood psychosis, hyperactivity, attention deficit disorder, attention deficit hyperactivity disorder, and conduct disorders that are significantly impairing their socialisation and/or learning in school. **(This category is not intended to include pupils whose conduct or behavioural difficulties can be dealt with in accordance with agreed procedures on discipline.)**

Some pupils in this category **may** need resource teaching support. Care support from a special needs assistant may be required where a pupil's behaviour is a danger to himself or others or where it seriously interferes with the learning opportunities of other pupils. In certain circumstances, some pupils may require both supports.

Moderate general learning disability

Such pupils have been assessed by a psychologist as having a moderate general learning disability.

A maximum allocation of 3.5 hours teaching support per week from a resource teacher may be made to schools in respect of each pupil assessed as having a moderate general learning disability (the pupils full-scale IQ score will have been assessed in the range 35 – 49).

Severe or profound general learning disability

Such pupils have been assessed by a psychologist as having a severe or profound general learning disability. In addition, such pupils may have physical disabilities.

Five hours teaching support per week from a resource teacher may be made to schools in respect of each pupil with a severe/profound general learning disability (the pupil's full-scale IQ score will have been assessed as being below 35).

Autism/autistic spectrum disorder (ASD)

A psychiatrist or psychologist will have assessed and classified such pupils as having autism or autistic spectrum disorder according to DSM–IV or ICD–10 criteria.

In the interest of the pupil with an ASD and in order that the needs of the pupil are adequately addressed, it is important, where feasible, that for a definitive assessment of ASD, a multi-disciplinary assessment team should be involved. The need for a multi-disciplinary assessment is also in keeping with the policy of the National Educational Psychological Service (NEPS).

A maximum allocation of 5 hours teaching support per week from a resource teacher may be made to schools in respect of each pupil assessed as having ASD.

Pupils with special educational needs arising from an assessed syndrome

The level of additional support to be provided for pupils who present with a particular syndrome e.g. Down syndrome, William's syndrome and Tourette's syndrome will be determined following consideration of psychological or other specialist reports which describes the nature and degree of the pupils special educational needs.

Where a pupil with an assessed syndrome has a general learning disability, resource teaching support will be allocated to schools in line with hours allocated to pupils assessed as being within the same IQ band (moderate/severe/profound GLD). Where a pupil with an assessed syndrome has any of the other low-incidence disabilities, resource teaching support will be allocated on that basis.

Specific speech and language disorder

Such pupils should meet **each** of the following criteria:

- The pupil has been assessed by a psychologist on a standardised test of intelligence that places non verbal or performance ability within the average range or above.
- The pupil has been assessed by a speech therapist on a standardised test of language development that places performance in one or more of the main areas of speech and language development at two standard deviations or more below the mean, or at a generally equivalent level.
- The pupil's difficulties are not attributable to hearing impairment; where the pupil is affected to some degree by hearing impairment, the hearing threshold for the speech-related frequencies should be 40Db;
- Emotional and behavioural disorders or a physical disability are not considered to be primary causes.
- Pupils with speech and language delays and difficulties are not to be considered under this category.
- In the case of specific speech and language disorder it is a pupil's **non-verbal or performance ability** that must be within the average range or above. (i.e. non-verbal or performance IQ of 90, or above).
- The pupil must also have been assessed by a speech and language therapist and found to be at two or more standard deviations (S.D.) below the mean, or at a generally equivalent level (i.e. - 2 S.D. or below, at or below a standard score of 70) in one or more of the main areas of speech and language development.

- **Two** assessments, a psychological assessment and a speech and language assessment are necessary in this case.
- A maximum allocation of 4 hours teaching support per week from a resource teacher may be made to schools in respect of each pupil assessed as having specific speech and language disorder.

Multiple disabilities

Pupils assessed with multiple disabilities meet the criteria for two or more of the disabilities described above. A maximum allocation of five hours teaching support per week from a resource teacher may be made to schools in respect of each pupil assessed as having multiple disabilities

Learning Support

The general allocation model provides additional teaching resources to assist schools in making appropriate provision for:

Pupils who are eligible for learning support teaching: *In determining eligibility for learning support teaching, priority should be given to pupils whose achievement is at or below the 10th percentile on standardised tests of reading or mathematics*

Pupils with learning difficulties, including pupils with mild speech and language difficulties, pupils with mild social or emotional difficulties and pupils with mild coordination or attention control difficulties associated with identified conditions such as dyspraxia, ADD, ADHD.

SP ED 08/02

Borderline Mild General Learning Disability

Such children have been assessed by a psychologist as having a borderline mild general learning disability. A psychologist may recommend such children for additional teaching support or special class placement on account of a special learning problem such as:

- Mild emotional disturbance associated with persistent failure in the ordinary class (disruptive behaviour on its own, however, would not constitute grounds for special class placement or additional teaching support);
- Immature social behaviour;
- Poor level of language development in relation to overall intellectual level. A recommendation to place such a child in a special class or to allocate additional teaching resources to support a school in catering for his/her needs should take into account the extent to which the child is making progress in his/her present learning environment and the other existing support available to the child in his/her school.

Mild General Learning Disability

Such children have been assessed by a psychologist as having a mild general learning disability.

Specific Learning Disability

Such children have been assessed by a psychologist as:

1. Being of average intelligence or higher; and
2. Having a degree of learning disability specific to basic skills in reading, writing or mathematics which places them at or below the 2nd percentile on suitable, standardised, norm-referenced tests.

Children who do not meet these criteria and, who in the opinion of the psychologist, have a specific learning disability are more properly the responsibility of the remedial teacher¹ and/or the class teacher.
